## Profile Summary

---

Software Developer with hands-on experience building full-stack web applications and managing databases. Proficient in Node.js, JavaScript, and modern frontend technologies, with a proven track record of solving complex technical challenges in fast-paced environments. Dedicated to writing clean, maintainable code and delivering user-centric software solutions.

## Projects

---

### MediaFeed Web Application (Completed Demo) [<https://media-feed-ten.vercel.app/>]

- Role: Full-Stack Developer
- Built and deployed a dynamic media-sharing web application utilizing HTML5, CSS3, and JavaScript, managing version control via GitHub.
- Implemented responsive UI components to ensure seamless cross-device compatibility and optimized load performance.

### FiboTask Web Application | [<https://github.com/Rayno-0x/FiboTask>]

- Role: Backend Developer
- Developed a dual-function web application featuring a task management system and a dynamic Fibonacci sequence generator using Python and the Django framework.
- Architected and integrated a relational database using PostgreSQL and pgAdmin to securely store, organize, and retrieve user task data.

## Experience & Community

---

### Software Development Intern - Hiit plc

May 2026-Present

- Write and execute backend scripts utilizing Node.js to streamline data processing and optimize web application performance.
- Develop responsive, structured web layouts using HTML, CSS, and JavaScript.
- Collaborating with developers to align business goals with technical milestones.

### Software Development Trainee - Labs by Bincom

April-June 2026

- Participate in intensive technical training, collaborating on product development proposals and software architecture.
- Apply foundational Python programming concepts to real software development scenarios.

## Academic History

---

### Federal University of Technology, Akure (FUTA) - 500 level (Final Year)

Bachelor of Engineering in Computer Engineering

2023-Expected May 2027

- Relevant Courses: Programming, SDLC.
- GPA: 3.8 / 4.0

## Awards & Hackathons

---

- 2nd Place Winner (WEMA Hackathon 6.0): Collaborated with a team to rapidly develop, debug, and pitch a technical solution under strict time constraints.

## Skills

---

- Core Stack: JavaScript, Node.js, HTML5, CSS3
- Databases & Tools: PostgreSQL, Git & GitHub, VS Code
- Familiarity & Concepts: Python (Basic), RESTful APIs, Problem-Solving
