Profile Summary

I am a Computer Engineering student with a passion for software development and problem-solving. Currently building a background in frontend development and data concepts. I am a fast learner seeking an internship opportunity to contribute to real-world projects while developing my technical skills under professional guidance.

Experience & Community

Brand Design & Co-Founder - SmartAR Tailor (Techspire)

May 2025-Present

- Collaborating with a technical team to build SmartAR Tailor, an augmented reality fashion solution currently in the development phase.
- Designed the company's visual identity and logo, translating the product vision into a clear brand asset.
- Collaboratating with developers to align business goals with technical milestones.

Member - Google Developers Group

May 2025-Present

- Participate in technical workshops and seminars to stay updated on industry trends, including AI and web technologies.

Projects

Electromagnetic Wave Signal Analysis (Completed)

- Role: Team Lead
- Orchestrated data collection strategies and supervised team members in gathering RF readings from cellular masts.
- Applied signal processing techniques to identify frequency patterns and pinpoint interference sources.

Emergency Contact Directory Web App (Completed)

- Role: Project Data Manager
- Sourced, cleaned, and organized all data used in the directory for accurate integration.
- Collaborated with a team of developers to troubleshoot integration issues during the final build.

Academic History

2023-Present

Federal University of Technology, Akure (FUTA)

Bachelor of Engineering in Computer Engineering

- Relevant Courses: Programming, SDLC, Electronics, Artificial Intelligence.
- GPA: 3.8 / 4.0

Technical Training

Python and Machine Learning Fundamentals - AI Beam Builders | 4 Weeks

- Completed an intensive program on foundational Python language, machine learning concepts, model implementation, and practical applications using Python libraries (scikit learn, Numpy).

Skills

Technical Skills

- Programming: Python
- Basic Coding Skills (HTML5, CSS, JavaScript)
- Tools & Platform: VS Code, Git & GitHub

Soft Skills

- Problem-solving
- Communication Skills
- Collaboration

Interests

- Frontend Delopment
- Web Development
